

Yori Evo 48V

44

Low Voltage

^{EN} Yori Evo family has evolved and widened, now including a 48V low-voltage tracks version available both as adjustable spotlight and as pendant in four different sizes. In presenting a product or a piece of art, light plays an essential role: that's why Yori Evo 48V adds new dimensions, performances and unique flexibility to the gamma. Its outstanding CRI>98 option, enhances colours authenticity and materiality, adding value to any sales item or art object and drawing viewer's attention to it.

^{IT} La famiglia Yori Evo si è evoluta e ampliata, e ora include una versione per binari a bassa tensione da 48V, disponibile sia come spot orientabile che come pendente, in quattro diverse dimensioni. Nel presentare un prodotto o un'opera d'arte, la luce gioca un ruolo essenziale: per questo Yori Evo 48V aggiunge ora alla gamma nuove dimensioni, performance e una flessibilità unica. La versione con lo straordinario CRI>98 accentua l'autenticità e la materialità dei colori, attirando l'attenzione dell'osservatore e dando un valore aggiunto a qualsiasi prodotto o oggetto d'arte.

^{EN} No tools needed for mounting, thanks to the magnetic fixing.

^{IT} Montaggio senza attrezzi, grazie al fissaggio magnetico.

^{EN} Thanks to the magnetic fixing it's possible to move the spots anytime, even when they are on.

^{IT} Grazie al fissaggio magnetico è possibile spostare gli spot in qualunque momento, anche mentre sono accesi.

EN The Low Voltage tracks give you the freedom of making endless combinations. The same product on different tracks has different aesthetic effects. Like Yori Linear 48V: minimal or drop, depending on your lighting project.

IT I binari Low Voltage ti danno la libertà di creare infinite combinazioni. Lo stesso prodotto su diversi binari porta a differenti effetti estetici. Come Yori Linear 48V: invisibile o drop, a seconda del progetto di illuminazione.

^{EN} COB LEDs and POWER LEDs are distinguished by excellent luminous intensity in the smallest sizes now available on the market. This feature means these light sources can be integrated into very compact luminaires with unique performance, very high peak beam intensity (candela) and delivered lumens from 150lm to 4500lm. These light sources are characterised by lumen maintenance at high operating temperatures due to improved efficacy at high temperatures and better optical stability over time.

^{IT} I COB LED e POWER LED sono caratterizzati da un'eccellente intensità luminosa nelle dimensioni più ridotte ora disponibili sul mercato. Questa caratteristica consente l'integrazione di queste sorgenti in prodotti dalle dimensioni molto contenute con performance uniche, picchi di intensità in candele molto elevati e lumen delivered da 150lm fino a 4500lm. Queste sorgenti sono caratterizzate da un mantenimento costante nel tempo del livello di lumen ad alte temperature di utilizzo, grazie ad una migliore efficienza ad alte temperature e ad una migliore stabilità ottica nel corso del tempo.

Warm Dimming

^{EN} The new Warm Dimming LED technology can be used to change the lighting to meet the technical and design needs of the moment, creating a pleasant, halogen dimming effect; this soft or accent lighting is perfect for use in hotels, restaurants, wellness centres and homes.

^{IT} La nuova tecnologia LED Warm Dimming offre la possibilità di creare mutevoli atmosfere luminose a seconda dell'esigenza, ricreando il piacevole effetto della dimmerazione alogena; la luce, diffusa o d'accento, si integra alla perfezione in ambienti quali hotel, ristoranti, wellness e residenziali.

COB LED Warm Dimming

3000K	97	95	97	97	97	96	95	99	97	94	97	94	86	95	97	95

^{EN} Our solution combines two chips in a single COB LED. With this configuration, only a single driver supplies power and gradually reduces incoming amps to bring it in line with the desired output. By reducing power supply to the chips, the luminous flux is reduced and consequently the colour temperature resulting from the combination of the individually designated colour temperatures is automatically offset. This technology delivers a very wide range of adjustment for luminous intensity, with a very gentle, gradual change in colour temperature (from no more than 3000K to no less than 1700K). The CRI and colour rendering is excellent for the whole dimming range, with a CRI of up to 97 and an R9 of 94.

^{IT} La nostra soluzione combina due chip in un solo COB LED. Con questa configurazione, l'alimentazione è un unico driver che riduce gradualmente l'ampereaggio in entrata in funzione del rendimento desiderato. Diminuendo l'alimentazione ai chip, il flusso luminoso diminuisce e la temperatura di colore, che risulta dalla combinazione delle singole temperature stabilite, viene bilanciata di conseguenza. Questa tecnologia offre un campo di regolazione della luminosità molto ampio con una variazione della temperatura di colore molto morbida e graduale, da un massimo di 3000K a un minimo di 1700K. Il CRI e il rendimento dei colori è eccellente per l'intero range di dimmerazione, con valori di CRI fino a 97 e R9 di 94.

Wide range of accessories

Light in your hands

84

EN We have integrated Bluetooth technologies into our luminaire offer to deliver the best lighting design solutions. This control system allows you to adjust the lighting of single luminaire or of a group of ones, via smartphones, tablets, smartwatches, buttons and switches (also pre-existing ones). The control system can be integrated into the single device (Bluetooth Integrated control) or remotely inserted into the track (Bluetooth Remote System).

IT Per offrire le migliori e più flessibili soluzioni illuminotecniche abbiamo integrato le tecnologie Bluetooth nella nostra offerta. Questo sistema di controllo permette infatti di regolare l'illuminazione del singolo apparecchio o del gruppo di apparecchi semplicemente tramite smartphone, tablet, smartwatch, pulsanti e interruttori (anche pre-esistenti). Il sistema di controllo può essere integrato nel singolo apparecchio (Bluetooth Integrated control) o inserito in remoto nel binario (Bluetooth Remote System).

Bluetooth Integrated control

- EN The system enables:
- Direct wireless control of light source
 - Control device directly integrated into lighting fixture
 - Effective adjustment of luminous intensity and colour temperature
 - Creation of connected luminaire clusters

- IT Il sistema permette:
- Controllo wireless diretto della sorgente luminosa
 - Dispositivo di controllo integrato direttamente nell'apparecchio
 - Regolazione efficace di luminosità e temperatura di colore
 - Creazione di gruppi di apparecchi collegati tra loro
 - Creazione, configurazione e archivio di scenari luminosi personalizzati

EN For more info visit www.reggiani.net
 IT Per maggiori info visita www.reggiani.net

EN Control devices developed on DALI protocol that allows you to manage and control wireless luminaires for low voltage (48V) and mains voltage (220-240V) tracks. Devices communicate via Bluetooth Low Energy (BLE) with control apps with no need of wiring, control unit or router. There are two devices available, integrating two software options that work with different control apps.

IT Dispositivi sviluppati sul protocollo DALI, grazie ai quali, è possibile gestire e controllare in modalità wireless apparecchi per binari a basso voltaggio (48V) e mains voltage (220-240V). I dispositivi comunicano via Bluetooth Low Energy (BLE) con le applicazioni di controllo senza necessità di cablaggio, centraline o router. Sono disponibili due dispositivi che integrano due opzioni software alternative interfacciandosi con app di controllo differenti.

Bluetooth Remote System (Casambi)

Broadcast configuration (Up to 100 luminaires/Ghostrack drivers):

Single 4 configuration:*

4 groups configuration (Up to 64 luminaires/Ghostrack drivers)*

EN The system enables:

- Lighting equipment programming/control in broadcast mode: single point (max 4 devices) and lamps groups (up to 64 in 4 groups)
- User friendly interface
- Interface scenarios and customizations through images
- Automatic software update
- Cloud sharing of system and configurations

IT Il sistema permette:

- Programmazione e controllo degli apparecchi di illuminazione in modalità broadcast: single point (max 4 apparecchi) e gruppi di lampade (fino a 64 in 4 gruppi)
- Interfaccia user friendly
- Creazione di scenari e personalizzazioni interfaccia con immagini;
- Aggiornamento automatico del software;
- Condivisione dell'impianto e della configurazione tramite Cloud
